AI Solutions | Applied AI | AI Agents & Workflow Automation | Product & GTM Strategy

PROFILE

AI Solutions practitioner with 3 years of B2B SaaS marketing experience and an MSc in Strategic Marketing Management. Builds and ships tested, multi-agent AI systems using Python, LangGraph, FastAPI, and PostgreSQL/pgvector. 160 automated tests across five projects, all with CI.

AI PROJECTS

PositionPilot — Multi-Agent GTM Strategy Engine

n8n • PostgreSQL • OpenRouter • Docker

- 15 agents across 4 pipelines (positioning, ICP, messaging, GTM, SEO, plus competitive-narrative, customer-research, and brand-voice layers), with a human approval gate between drafting and full generation.
- 44 automated tests + CI: verifies webhook auth against the real exported n8n node config, not just prose, and applies the Postgres schema against a live database service.

langgraph-agents — Async AI Application Service

LangGraph • FastAPI • PostgreSQL • Docker

- Rebuilt an n8n workflow as a fully async FastAPI/LangGraph service: header-key auth, Postgres persistence, and typed error handling that distinguishes upstream failures from internal ones.
- 28 tests, fully offline — mocked HTTP client and database, no live network calls in CI.

grounded-rag — RAG Pipeline with Citations

FastAPI • PostgreSQL/pgvector • sentence-transformers

- Document ingestion, local embeddings, pgvector similarity retrieval, and cited generation grounded strictly in retrieved context.
- Integration testing against a real pgvector service caught and fixed two real bugs: a type-adaptation issue in the similarity query, and an IVFFlat index misconfigured for the corpus size.

job-search-score — Sponsorship-Aware Job Search Agent

Python • Claude Code

- Verifies UK sponsor-register status, salary floor, and role competitiveness before generating a tailored application in the user's own CV format.
- 37 tests + CI; open source with 2 stars, 1 fork, and a merged external contribution adding the Scale-up visa route.

Marketing Skills Hub (MSS) — AI Evaluation Standard

Fixed rubric • quoted evidence

- Reproducible, versioned rubric for scoring AI marketing skills against real output, evidence-cited per deduction — not ranked by GitHub stars.
- 23 tests caught a real arithmetic error in an already-published evaluation score, fixed in the record, tracker, and results table.

PROFESSIONAL EXPERIENCE

SaaS Pay — Marketing Executive → Team Lead

Jan 2022 – Jul 2023

B2B Fintech SaaS, Bangalore, India

- Promoted to Team Lead within 6 months, moving from execution into ownership of inbound strategy, messaging, and organic acquisition.
- Delivered 3× SQL growth, 3× incremental organic traffic, and a 45% reduction in blended CPL through intent-based SEO and content.
- Built a competitor-intelligence system tracking pricing and product changes, saving ~6 hours/week of manual research.

Palik Ltd — Content Strategist Intern

May 2025 – Aug 2025

Luxury Footwear, London, UK

- Built the company's content operation from scratch as the sole content operator for 4 months, across Instagram, Facebook, and LinkedIn.
- Increased average LinkedIn daily impressions from 2.4 to 13.6 and cross-platform engagement by 35% over 90 days.

Aston University — Marketing Strategy Intern

Feb 2025 – Mar 2025

Birmingham, UK

- Designed and ran an 8-day, £2,000 multi-channel campaign to 2,237 final-year students for the National Student Survey.
- Generated 1,936 completions (~87% of target) and increased communication open rates by 40%.

EDUCATION

MSc Strategic Marketing Management — Aston University, UK (2024–2025), CIM-accredited

BBA Marketing — Dayananda Sagar University, India — Leadership Award

SKILLS

AI & Agents: LLMs • AI Agents • Multi-Agent Systems • LangGraph • RAG • Prompt Engineering • Python

Build & Automation: n8n • FastAPI • REST APIs • PostgreSQL • pgvector • Docker • OpenRouter

Testing & Delivery: pytest • GitHub Actions CI • Automated Testing • Mocking • Schema Validation

Strategy: AI Solutions • Solution Design • GTM Strategy • Positioning • ICP • Product Marketing
